

## VK000004

### ACCESSORIES • CONNECTION TECHNOLOGY

The wiring of sensors and actors is considerably more comfortable with our sensor distribution box. The individual devices are connected with the distributor via an M8 or M12 cable that is pre-assembled on both sides. By means of the trunk line the effort for laying and wiring the cables can be reduced significantly. The operating mode display provides information about the sensors operating mode (operating voltage, switching state). Thus, troubleshooting is simpler, as an overview about the functioning of the connected periphery is directly given.

### ELECTRICAL DATA

Type of electrical connection, field side

M12

### DIMENSIONAL DRAWING

#### INSTALLATION

Mounting / Installation may only be carried out by a qualified electrician!

#### DISPOSAL

#### SAFETY WARNINGS

Before initial operation, please make sure to follow all safety instructions that may be provided in the product information!

Never use these devices in applications where the safety of a person depends on their functionality.
