

dimensions 15 x 30 x 30mm

plastic fiber optics through-beam sensor up to 1000mm

dif. reflection sensor up to 120mm

- √ switching state display by LED: yellow
- ✓ LED indicator for functional reserve: green
- ✓ integrated amplifier
- high switching frequency and switching distances
- ✓ exclusive OR output or alarm output
- √ connection with M8-connector or cable

miniature design visible red light

description

The devices in the **OL15** series are designed for the highest levels of performance with small dimensions (miniature housing). Despite the compact design, the user benefits from robust, industrial strength devices with all protective functions. Fiber optics are fitted in front of the transmitter and receiver. They are the extended eye of the photosensor. As the fiber optics only have small dimensions and are flexible, scanning tasks in places which are difficult to access can be completed easily. In addition, no electrical voltage is transferred.

As such, fiber optics can also be used without particular precautions in areas at risk of explosion and in the presence of highly charged electrical and magnetic fields (high voltage systems, electric welding equipment).

By selecting appropriately thin fibers, the smallest of objects can be detected. Using fiber optics, both the functions of the through-beam sensor as well as that of the diffuse reflection sensor can be realized.

The built-in functional reserve helps the user when aligning and setting the device. As such, soiling can additionally be spotted at an early stage and removed.

application examples

- detection of markings
- quality control of printing
- presence checks of metal pins
- ▶ foil width recognition

FIBER OPTIC SENSORS

	OL150105	OL150175
connection	cable	M8-connector

This data sheet contains the standard versions only. Kindly request the availability of other output- and connection versions.

We will be pleased to supply the matching cable socket for your devices with connector. Please refer to the list in catalog chapter "accessories" under "cable sockets ipf-sensorflexe" or search our website for "VK".

Warning: Never use these devices in applications where the safety of a person depends on their functionality.
