

## IV40A530

### INDUCTIVE SENSORS • ENLARGED AMBIENT TEMPERATURE

Inductive proximity switches are contact-free sensors. They detect all conductive metals, regardless of whether they move or not. The achievable sensing range of the devices depends on the object material and its dimensions. The vibration-resistant sensors can be approached laterally or frontally. Inductive proximity switches are used for presence detection (e.g. goods carriers), positioning (e.g. dampers), counting (e.g. nuts /bolts), speed detection (e.g. for cog wheels), on conveyor systems (e.g. hose feedings) or distance measurements (e.g. press-in checking) of metallic objects.

#### MECHANICAL DATA

Mounting method

Floor fastening

#### ELECTRICAL DATA

Type of electrical connection

Plug-in connection M12

#### DIMENSIONAL DRAWING

##### INSTALLATION

Mounting / Installation may only be carried out by a qualified electrician!

##### DISPOSAL

##### SAFETY WARNINGS

Before initial operation, please make sure to follow all safety instructions that may be provided in the product information!
