

VL250120

CONNECTION TECHNOLOGY • LOGIC MODULES

Connecting digital signals directly at the machine can contribute to significant cost and effort minimization. A classic application is the linking of different signals directly in the field. Thus, it is possible to avoid long line paths of many individual devices, which significantly reduces the wiring effort and the need for control inputs. All input signals on the logic modules are visualized by integrated LED and are electrically decoupled from each other. In this way, influences from one device to the other are reliably prevented. The outputs of the modules are overload-proof and the upcoming signal is also indicated by an LED. In addition to logical input signal connections such as AND and OR, versions with signal change control are also available. The ipf logic modules are available for DIN rail mounting or as field modules. Therefore and because of the robust housing, which is characterized by a high degree of protection against the penetration of dust and water, our devices can be used in all areas of machines, equipment and tools.

MECHANICAL DATA

Ambient temperature (MAX)	60 °C
Ambient temperature (MIN)	-25 °C
Degree of protection (IP)	IP40
Depth	49 mm
Expandable	No
Front installation possible	No
Height	80 mm
Housing material	Plastic
Rack-mounting possible	No
Rail mounting possible	Yes
Suitable for DIN rail (top hat rail) mounting	Yes
Wall/direct mounting possible	No
Width	25.5 mm

ELECTRICAL DATA

ASI protocol supported	No
AS-Interface Safety at Work protocol supported	No
Base device	No
CAN protocol supported	No
Data-Highway protocol supported	No
DeviceNet protocol supported	No
DeviceNet Safety protocol supported	No
EtherNet/IP protocol supported	No
Expansion device	No
Foundation Fieldbus protocol supported	No
INTERBUS protocol supported	No
INTERBUS-Safety protocol supported	No
IO-Link compatible	No

ELECTRICAL DATA

IO-Link master	No
KNX protocol supported	No
Logic	OR
LON protocol supported	No
Max. output current	0.3 A
MODBUS protocol supported	No
No-load current	5 mA
Number of inputs per logic unit	4
Number of logic units	1
Number of pins of connections, control side	10
Number of pins of connections, sensor side	10
Number of sensor connection positions	4
Other bus systems are supported	No
PROFIBUS protocol supported	No
PROFINET CBA protocol supported	No
PROFINET IO protocol supported	No
PROFIsafe protocol supported	No
Radio standard Bluetooth	No
Radio standard GPRS	No
Radio standard GSM	No
Radio standard UMTS	No
Radio standard WLAN 802.11	No
Redundancy capability	No
SafetyBUS p protocol supported	No
SUCONET protocol supported	No
Suitable for safety functions	No
Supply voltage at DC (MAX)	35 V
Supply voltage at DC (MIN)	10 V
Switching frequency	5000 Hz
TCP/IP protocol supported	No
Type of electrical connection, control side	Clamp
Type of electrical connection, sensor side	Clamp
Voltage drop	2.1 V
Voltage type of supply voltage	DC
With display	No
With LED display	Yes
With optical interface	No
With relay output	No

OTHER DATA

Corresponding equipment (Ex ia)	No
Corresponding equipment (Ex ib)	No
SERCOS protocol supported	No
With timer clock	No

DIMENSIONAL DRAWING

INSTALLATION

Mounting / Installation may only be carried out by a qualified electrician!

DISPOSAL

SAFETY WARNINGS

Before initial operation, please make sure to follow all safety instructions that may be provided in the product information!

Never use these devices in applications where the safety of a person depends on their functionality.
